

SUMMER 2020

University of Toronto Centre for Global Change Science Summer Research Training Program

As one component of the Scholarship Programme of the Centre for Global Change Science at the University of Toronto, the following undergraduate opportunity is announced: Undergraduate Summer Training Program in Scientific Research

Undergraduate students with an interest in environmental Biology, Chemistry, Forestry, Geography, Geology or Physics are invited to apply for summer research training to be held at the University of Toronto. Successful applicants will have the opportunity to participate in research programs within the research groups of faculty affiliated with the Centre as well as to participate in activities that will expose them to the full breadth of topics that are of concern in the area of global change science.

Each training opportunity will be a minimum of 12 weeks to a maximum of 16 weeks with a salary of \$526.50 per week. Interested undergraduates from across Canada are encouraged to apply. However, preference will be given to Canadian citizens and permanent residents according to Canadian immigration regulations. Each student will be expected to produce a poster and a 15 minute talk on their work at the end of the training.

Prospective summer trainees are responsible for identifying a faculty advisor in the specific sub-area in which they would prefer to work. Please check the CGCS web site for a list of faculty: <http://www.cgcs.utoronto.ca/people.htm> Note to UofT students, please also provide your student number and we'll print your transcript.

Interested applicants with an appropriate background in science or engineering should arrange to have an official copy of their undergraduate transcript and a one page (maximum) letter describing their interest in global change science sent by **February 21, 2020** to:
