“New needs for glass in the time of pandemic”

Ela Bakowska, Ph.D., Research Associate, Corning RDC, Corning, NY

COVID-19 pandemic presents multiple challenges to all of us in our private and professional endeavors. Different glass products and applications allow people not only to adapt to new ways of life and work, but also play a big role in the fight against the pandemic.

Almost all Corning Incorporated products are utilized in one way or another in dealing with the pandemic: optical communication, display, mobile consumer electronics, pharmaceutical packaging and other Life Science products.

My talk will concentrate on two applications: pharmaceutical packaging and antimicrobial/antiviral glass.
